PROFILE

Engineering leader and senior software engineer with 10+ years of experience building cloud-native products and distributed systems for real-time operations. Currently serving as Acting Engineering Manager at Delivery Hero, combining hands-on architecture with people leadership, cross-functional delivery, mentoring, planning, and stakeholder alignment. Strong experience with TypeScript, Node.js, React, event-driven architecture, GCP, BigQuery, Kubernetes, and observability.

PROFESSIONAL EXPERIENCE

Acting Engineering Manager / Senior Software Engineer (IC3) | Delivery Hero

Apr 2022 - Present

Berlin, Germany

- Lead planning and delivery for Partner Central, introducing structured product and technical refinement, epic-based roadmap planning, paired ownership, and parallel initiative execution while remaining hands-on with implementation and reviews.
- Coordinate Engineering, Product, Data, Design, and Operations to translate ambiguous commercial and operational needs into clear, incremental delivery plans and maintainable platform capabilities.
- Architect and evolve event-driven services and React applications using TypeScript, Node.js, GCP Pub/Sub, BigQuery, MongoDB, Redis, GraphQL, and GKE for asynchronous workflows and continuously changing operational state.
- Improve reliability and maintainability through stronger observability, safer background processing, data synchronisation improvements, incident leadership, and focused technical-debt reduction.
- Develop engineers through regular feedback, delegation, technical guidance, design reviews, and ownership coaching, strengthening delivery clarity and accountability across the team.

Senior Full Stack Developer | Honest Food (Delivery Hero)

Aug 2018 - Mar 2022

Goa, India / Berlin, Germany

- Designed and delivered services for food-delivery logic, ERP, ordering, invoicing, and supply-chain operations using Node.js, React, GraphQL, MongoDB, MySQL, and GCP in a fast-growing scale-up.

Full Stack Developer | Kodework United LLP

Mar 2018 - Jul 2018

Goa, India

- Delivered custom web platforms and WordPress solutions from requirements and architecture through testing and production release.

Full Stack Developer | Diet Code Application Private Limited

Aug 2014 - Jan 2018

Goa, India

- Built full-stack e-commerce and product-discovery capabilities across backend services, frontend applications, SQL databases, integrations, and production operations.

TECHNICAL & LEADERSHIP SKILLS

Leadership: Acting engineering management, people leadership, cross-functional delivery, agile planning, mentoring, stakeholder management, system design, architectural decision-making

Technology: TypeScript, JavaScript, Node.js, Next.js, React, GraphQL, Koa.js, SQL, MySQL, GCP, GKE, Pub/Sub, BigQuery, Kubernetes, Terraform, Helm, MongoDB, Redis, GitHub Actions; familiarity with NestJS and Datadog

EDUCATION

Bachelor of Engineering, Computer Engineering

2010 - 2014

Padre Conceicao College of Engineering, Goa
